

FUSED CAST ALUMINA BLOCK

Introduction:

β Alumina TY-H: TY-H has high temperature better alkali resistance and excellent thermal stability properties. It is a new type of refractory material for breast wall, port mouth and top crown of float glass furnace.

Physical and chemical index

Item		FUSED CAST ALUMINA
		β Alumina TY-H
Chemical Composition %	Al ₂ O ₃	93
	SiO ₂	-
	NaO ₂	6.5
	Other oxides	0.5
Crystallographic Analysis %	α -Al ₂ O ₃	0
	β -Al ₂ O ₃	99
	Vitreous Phase	1
